Sheathing Wall Seam - S1.1

Sheathing Wall Construction with gypsum, plywood or OSB sheathing.

Spot all over-driven, or improperly installed fasteners with FastFlash or Joint & Seam Filler.

Apply a thick bead of FastFlash or Joint & Seam Filler to all sheathing joints.

Use a dry joint knife or trowel to spread 1 inch beyond the seam on each side to a thickness of 20-30 mils.

Follow sheathing manufacturer recommendations to repair joints or gaps greater than 1 inch.

Apply the selected R-Guard air and water-resistive barrier over the prepared sheathing wall.
