Rough Opening with FastFlash & Building Wrap S13.1

Sheathing Wall Construction with gypsum, plywood or OSB sheathing.

Begin with FastFlash applied as in S4.1A or FastFlash and Joint & Seam Filler applied as in S4.1B.

Step One Apply AirDam to the outer edge of the rough opening and tool to 20-25 wet mils.

Step Two Press building wrap into wet AirDam.

Step Three Apply AirDam at interface of building wrap and rough opening, and tool it to 20-25 mils, so that it half covers the building wrap and half overlaps into the rough opening.
